Lead Experience Designer · AI-first service design for enterprise transformation

linkedin.com/in/sam-mozaffari-210588a7 · Sydney, AU · remote-friendly

Seven years across enterprise research, product and service design, with the last four spent building AI into the core of the practice. At KFC South Pacific I set the service design and research standard for an 800+ restaurant network. I frame the problems, run an evidence-gated practice powered by an AI agent team I built myself, and carry the work through executives, franchise boards and frontline teams to piloted, measured outcomes.

EXPERIENCE

Jul 2024 – now

Lead Experience Designer

KFC South Pacific · 800+ restaurant network (franchise, equity and corporate)

- **Raised drive-thru customer satisfaction by 15%** through behavioural research and two sequenced pilots, including a null result we acted on. Also designed the human side of self-service and the kiosk floor-role standards.
- **Cut application-to-interview from over 14 days to under 2** with an end-to-end recruitment and onboarding overhaul, piloted then rolled out network-wide; 9 in 10 restaurant teams reported better candidates.
- **Retired a legacy learning platform** on a business case I quantified at around \$26k a year in avoidable support costs. The two-market pilot ran with zero support tickets and over 1,000 completions.
- Set the network's employee experience agenda. Blueprinted the first twelve weeks of the manager journey from more than 20,000 survey responses and modelled turnover economics per store, working with a four-person EX team, franchise governance forums and an external consultancy.
- Set the workforce platform roadmap with a 16-stage, 10-lane blueprint that identified 175 pain points; the top fixes landed in the vendor's committed releases. Made AI-integrated research the standard across the business, cutting research cycles from months to days.

Jul 2021 – Jul 2024

Product Designer

ZETR · electrical hardware and digital products

- Redesigned product onboarding end to end: **+12% new-customer conversion**, -35% sales support inquiries, WCAG 2.1 throughout.
- Designed an electrical fast-charging system from concept to launch: **\$1M+ sales in the first quarter**, informed by three years of testing with tradespeople and architects.
- Shipped the flagship 25 System flush-mounting platform and owned the full product lifecycle: production documentation, engineering drawings, manufacturing guides.

Nov 2020 – Aug 2023

UX Designer (part-time, concurrent with study)

Service NSW

Worked in a team on the redesign of financial-assistance applications in NSW, WCAG compliant, shipped to a state-wide user base.

Aug 2019 – Jun 2021

Product Designer

Black Lab Design · Woolworths, Wesfarmers and ANZ

Checkout systems and fresh-produce displays for Woolworths; accessibility-first point-of-sale design for Wesfarmers and ANZ.

CAPABILITIES

Service design: research at scale, synthesis, journey mapping, multi-lane blueprinting, co-design, pilots, measurement, governance.

Applied AI: agent-team orchestration with human-in-the-loop judgment, on platforms I design and operate (BUZZ, DeepSeek Harness Studio) plus Claude Code; 80 service-design methods encoded as repeatable agent procedures; evaluation and QA gates on every output.

Building: research platforms (Python/Flask), a 30-tool MCP engine, working prototypes; author of a published book and 10-course curriculum on AI-first service design.

Leadership: exec and franchise-board stakeholders, cross-functional working groups, external consultancies, company-wide CX programs.

SELECTED CASE STUDIES

[Where Humans Matter Most](#): two pilots for human connection in an automated drive-thru.

[Hiring in Days, Not Weeks](#): recruitment and onboarding blueprinted end to end.

[The Manager Makes or Breaks It](#): the first twelve weeks of the manager journey, from 20,000+ responses.

EDUCATION & AWARDS

University of Technology Sydney: Product Design (2020–2022); Creative Intelligence & Innovation (2020–2023).

Bright Awards: Product Designer of the Year (2018).
