

Seven years across enterprise research, product and service design — the last four building AI into the core of the practice. At KFC South Pacific I set the service-design and research standard for an 800+ restaurant network: I frame the problems, run an evidence-gated practice powered by an AI agent team of my own design, and carry the work through executives, franchise governance forums and frontline teams to piloted, measured outcomes. Seeking a Head of / Principal Service Design role where an AI-first practice has to be built, led and proven.

EXPERIENCE

Jul 2024 – now

Lead Experience Designer

KFC South Pacific — 800+ restaurant network (franchise, equity, corporate)

- **Raised drive-thru customer satisfaction 15%** via behavioural research and two sequenced pilots (including a null finding that redirected investment); designed the human half of self-service and kiosk floor-role standards.
- **Cut application-to-interview to under 2 days** with an end-to-end recruitment and onboarding overhaul, piloted then rolled out network-wide; 9 in 10 restaurant teams reported better candidates.
- **Retired a legacy learning platform** on a business case I quantified (~\$26k/yr avoidable support cost); two-market pilot ran at zero support tickets with 1,000+ completions.
- Set the network's employee-experience agenda: first-12-weeks manager journey blueprinted from 20,000+ survey responses, turnover economics modelled per store — delivered with a 4-person EX core team, franchise governance forums and an external consultancy.
- Set the workforce-platform roadmap (16-stage, 10-lane blueprint; 175 pain points; 15+ impact-sized recommendations — top fixes landed in the vendor's committed releases) and made AI-integrated research the standard across the business, compressing research cycles from months to days.

Jul 2021 – Jul 2024

Product Designer

ZETR — electrical hardware and digital products

- Redesigned product onboarding end to end: **+12% new-customer conversion**, –35% sales support inquiries, WCAG 2.1 throughout.
- Designed an electrical fast-charging system from concept to launch: **\$1M+ sales in the first quarter**, informed by three years of testing with tradespeople and architects.
- Shipped the flagship 25 System flush-mounting platform and owned the full product lifecycle: production documentation, engineering drawings, manufacturing guides.

Nov 2020 – Aug 2023

UX Designer (part-time, concurrent with study)

Service NSW

Led the mobile-app redesign for financial-assistance applications, WCAG compliant, shipped to a state-wide user base.

Aug 2019 – Jun 2021

Product Designer

Black Lab Design — Woolworths, Wesfarmers, ANZ

Checkout systems and fresh-produce displays for Woolworths; accessibility-first point-of-sale design for Wesfarmers and ANZ.

CAPABILITIES

Service design: research at scale, synthesis, journey mapping, multi-lane blueprinting, co-design, pilots, measurement, governance.

Applied AI: agent-team orchestration with human-in-the-loop judgment; 80 service-design methods encoded as repeatable agent procedures; evaluation and QA gates on every output.

Building: research platforms (Python/Flask), a 30-tool MCP engine, working prototypes; author of a published book and 10-course curriculum on AI-first service design.

Leadership: exec and franchise-board stakeholders, cross-functional working groups, external consultancies, company-wide CX programs.

SELECTED CASE STUDIES (ANONYMIZED, PUBLISHED)

Where Humans Matter Most — two pilots for human connection in an automated drive-thru.

Hiring in Days, Not Weeks — recruitment & onboarding blueprinted end to end.

The Manager Makes or Breaks It — first-12-weeks manager journey from 20,000+ responses.

EDUCATION & AWARDS

University of Technology Sydney — Product Design (2020–2022); Creative Intelligence & Innovation (2020–2023).

Bright Awards — Product Designer of the Year (2018).
